

SAROST

40 YEARS OF
G R E A T N E S S

WHO ARE WE !

Since 1982, SAROST is providing integrated and specialized services in the fields of Water, Energy and Environment. Forty (40) years of experience allowed SAROST team to develop and consolidate a recognized know-how, expertise and professionalism in order to offer customer tailored services that meet its clients' demands and satisfaction.

Health, Safety and Security (HSS) remain at the heart of all SAROST's operations, and our company training and awareness programs are deeply rooted in the reinforcement of an effective employee HSS culture.

Furthermore, SAROST is fully conscious of its social and environmental responsibilities, which come within a sustainable development approach. Our marine expertise, our dedicated and highly skilled team enables us to deliver customer tailored solutions to the most demanding clients. We provide the following integrated world-class solutions that incorporate innovative skills and technologies.

Integrated Logistics Services

Offshore Operations Management & Support

DIVING SERVICES

40 YEARS OF DIVING

Know-how combined with IMCA guidelines

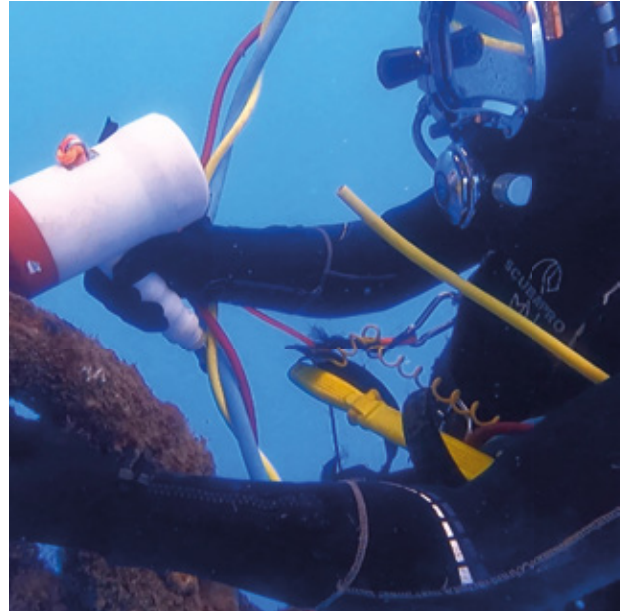

Rely on our 40 years' diving experience

Wide range of diving services

Know-how combined with IMCA guidelines

Our organization has a deep understanding of the best practices of the industry. We are committed to complying with the highest diving standards and to following IMCA guidelines wherever we operate to safely deliver a quality diving service.

We are recognized by the majority of IACS Members as a Service Provider for In-water Survey/ UWILD.

Rely on our 40 years diving experience

All our diving team is certified from internationally accredited training centers and is IMCA recognized to perform in high-risk environments.

Our specialists have the experience to tackle complex challenges that come with any new project. Highly qualified and solution-oriented, our engineering team is there to get the job done no matter what it takes.

Wide range of diving services

We have the expertise and the capability to meet our clients' specific requirements and to handle all aspects of diving operations whether it's surface assistance or underwater works and interventions, including tanker Off-take assistance, in-water survey / UWILD, subsea infrastructure installation, Offshore decommissioning projects, underwater cleaning, maintenance, repair and NDT inspection, salvage operations.

ROV & SURVEY SERVICES

Meet your ROV specialist

Marine survey services

Get an integrated solution to your project

Meet your ROV specialist

We own and operate one of the most reliable and field-proven ROV system in the industry. We are equipped to provide a wide range of ROV services starting from general visual inspection, assistance for repair and maintenance (IRM) , including NDT, FMD, as well as a drill support during field installation/decommissioning. In addition, we are constantly expanding our operational capabilities and working closely with our partners to stay on top of the latest developments in the industry and to provide a wide range of underwater robots including Work-class ROV.

Marine survey services

SAROST has the necessary resources, skills, manpower and equipment to perform geophysical & geotechnical studies including seabed mapping, Side Scan Sonar survey, sediment sampling, underwater positioning... We also carry out oceanographic studies and environmental surveys, to support offshore and marine development projects. Our team of highly experienced hydrographic surveyors and marine engineers are ready to assist clients with a range of hydrographic surveying technologies and equipment using latest methods and software to deliver high-resolution data.

Get an integrated solution to your project

Our philosophy is to always provide clients with reliable and integrated services at the least cost and risk. Our project managers, engineers and specialist operational staff are compliant with current offshore industry requirements and are well experienced to meet our clients' expectations. We can provide an integrated solution with the best possible combination of quality, cost and schedule to comply with each project's needs involving diving, ROV and survey services with our dedicated support vessel.

OFFSHORE VESSELS

+30 000 DAYS OF CHARTER
+100 CONTRACTS
+200 MARINE CREW

40 years

Varied fleet

Tailored solutions

40 years

SAROST has always been the leader in the marine support for the energy sector with more than 40 years of experience in vessel chartering.

You can rely on us to carry out your big-scale projects with an acute expertise and an unrivalled commitment.

Varied fleet

Whatever your needs are, we are able to provide various types of vessels including:

- Anchor Handling Tug Supply (AHTS) equipped with dynamic positioning
- Platform Supply Vessels (PSV)
- Anchor Handling Tug (AHT)
- Floating Storage and Offloading (FSO),
- Mobile offshore Drilling / Production Unit (MODPU)
- Series of pontoons, barges and small crafts

Tailored solutions

With the other subsea services provided by SAROST such as Diving, Survey and ROV solutions, we can offer tailormade plans, specifically designed to meet your requirements in Offshore projects while optimizing budgets and timelines.

INTEGRATED LOGISTICS SERVICES

+40 000 M² * OF STORAGE FACILITIES

INCLUDING 1500 M² OF COVERED AND
SEMI-COVERED AREAS

Pick your location

Find your best fit

Get the whole package

Pick your location

Our supply bases in Sfax and Sahline serve two of Tunisia's most active commercial ports. Strategically located, safely guarded and properly maintained to high standards, these facilities are designed to meet our clients' stricter requirements.

Find your best fit

Many storage options are available at our sites thanks to various dedicated spaces, all perfectly adaptable to meet your specific requirements.

Our facilities vary from open yards to warehouses, pipe storage yards, washing areas and dedicated space for chemicals and hazardous equipment. Every operation is conducted with the same rigorous adherence to safety and quality protocols.

Get the whole package

We're all set to take charge of all your projects logistics by providing skilled manpower and supply chain management services from project start to final delivery.
